# ROAMLY GROUPS

GO-TO-MARKET STRATEGY / V1 WORKING DRAFT

PLG FIRST | PILOT

Make group experiences easier to book. Prove they create incremental growth.

**VALUE PROPOSITION** **Explore together. Book together. Pay your way.**

01 / WHO

## HIGH-INTENT CUSTOMERS

- Existing Roamly customers who have attempted or shown intent to book with friends.
- Secondary audience: friends invited into a group booking.

02 / WHY NOW

## PROVEN FRICTION

- Customers coordinate availability and split payments across separate accounts.
- High group-session drop-off signals demand, but market size remains unproven.

03 / WHAT WE MUST PROVE

## TRUE EXPANSION

- More completed bookings, not only individual bookings shifting to group checkout.
- Hosts can support the promised group sizes and availability.

## CHANNEL PLAN / PRIORITIZE OWNED REACH

| | |
|---|---|
| 01 IN PRODUCT | Contextual Book with Friends prompts on experience pages and checkout. |
| 02 CRM | Email / push to users with group intent or abandoned bookings. |
| 03 INVITES | Shareable group links to drive friend participation and activation. |
| 04 COMMUNITY | Selective travel-community pilots; scale only if incremental. |

## ROLLOUT / VALIDATE BEFORE SCALING

| | |
|---|---|
| VALIDATE | Size intent and drop-off; interview users; confirm host capacity and baseline economics. |
| PILOT | Test in 2-3 supply-ready cities with a randomized eligible-customer holdout. |
| SCALE | Extend only after verified incremental uplift, viable margins and reliable fulfillment. |

## SUCCESS SCORECARD

PRIMARY **Incremental completed bookings per eligible customer**

Pilot vs. randomized control; assess impact on total bookings, not only group checkouts.

GUARDRAILS Contribution margin / Host fulfillment / Payment failures / Cancellations

DECISION RULE Scale only when the pilot demonstrates incremental value and operational reliability.
